

Elemental Sleep™

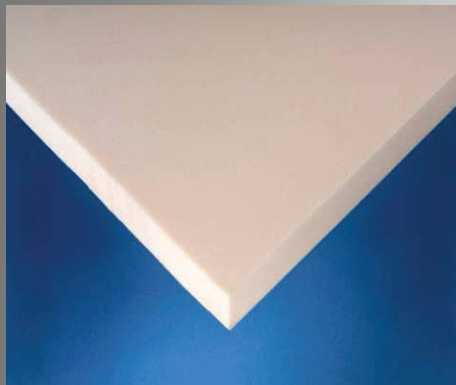

Comfort Support Temperature

# LIVELY

### High Density Foam Core

Contains high-density cells that achieve the comfort level needed in a mattress. It has an excellent initial comfort and luxurious feel. Not only is it initially soft, but the high-density cells won't bottom out over time.

### High-Density Plush Foam

Polyurethane foam for a comfortable feel with resistance to body impressions.

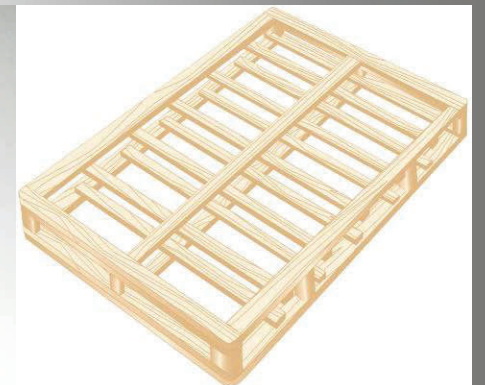

### Gel-Infused Foam Layer

Gel infused memory foam to help maintain your body temperature for a deeper sleep. It is designed to absorb and distribute pressure.

### Memory Foam Comfort Layer

Open-celled visco-elastic memory foam that gives superior response to your shape and body temperature to reduce pressure points.

### High Performance Wood Foundation

Edge-to-edge support that provides a stable feel and long mattress life.
