designs for the sleep of your life

High-Performance Stretch Cover

High-performance stretch cover is quilted to two quilting foam layers for a luxurious and supportive sleeping surface.

Convolute Comfort Foam

Convolute comfort foam provides a comfortable, body-conforming feel while it enhances breathability by improving the circulation of air in and around the foam.

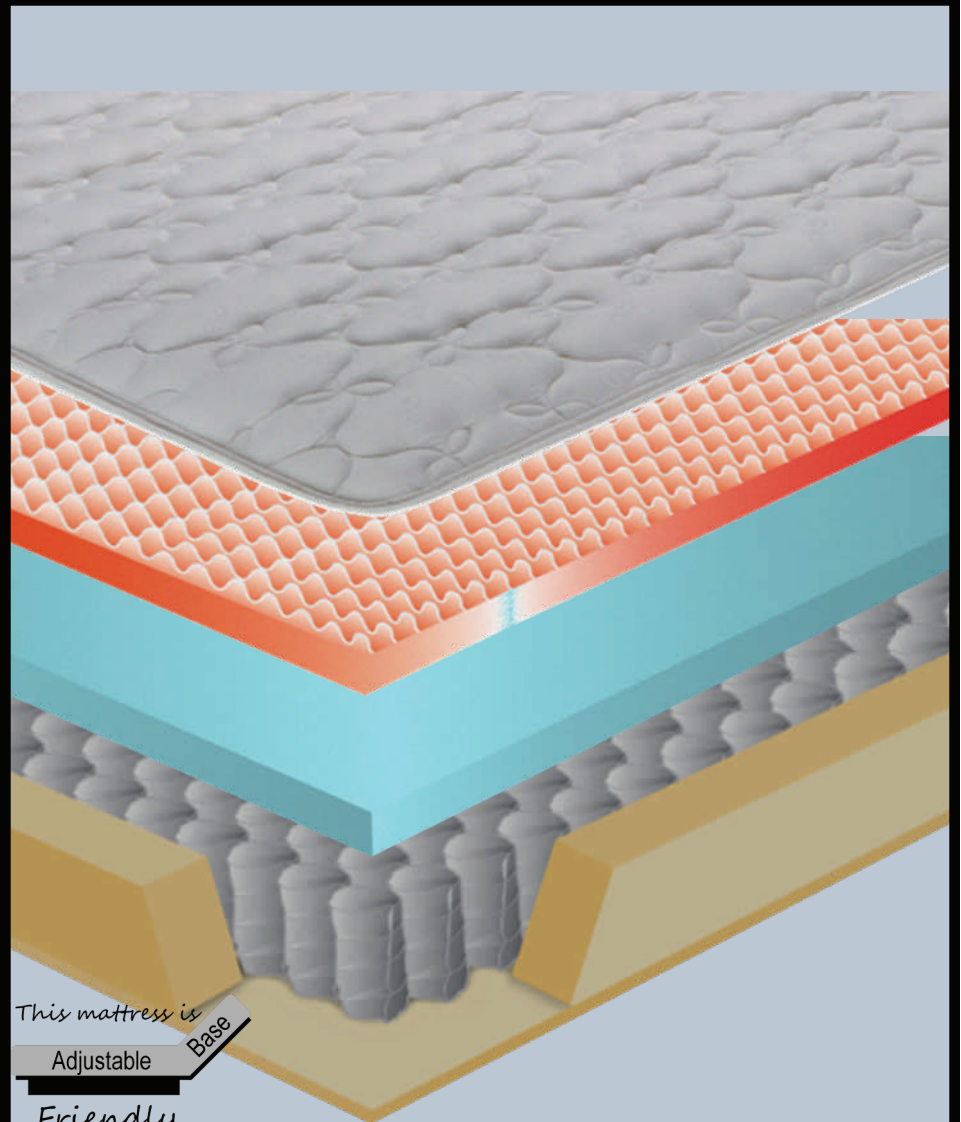

Foam-Encased Individually Wrapped Spring Unit

800 individually wrapped coils (queen density) move independently for extra comfort and support. This helps prevent partner disturbance and roll-together, and wrapped spring units are naturally quieter for an undisturbed and more peaceful night's sleep.
